PROBLEM STATMENT

- Web based online examination system.
- Efficiently evaluate the student thoroughly through a fully automated system that not only save a lot of time.
- Examination contains Multiple Choice Questions.
- Using different features of the examination system, the administrator can set the exam name, exam time, questions for the corresponding exam etc.
- Online examination systems help students to offer a quick and easy way to appear for the test.

SOLUTION

- We propose to build a website for online examination system.
- Provide an easy to use environment for both the test conductors and the students appearing for the exam.
- Also gives fast and accurate results.

HOW IT WORKS

- Student can register and login to an account.
- After registering, student can view the appropriate courses and start the exam in given time.
- Should complete the exam on given time.
- They can also view their result.
